EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science – **CGPA: 8.67**

Bhopal, Madhya Pradesh, India

Sep. 2022 – Apr. 2026

K.K. Public School

Class XII – PCM – **Score: 92.8%**

Meerut, Uttar Pradesh, India

May 2022

EXPERIENCE

Software Developer Intern

Nov. 2025 – May 2026

StayChat AI

Varanasi, India

- Built and shipped production **React.js** features end-to-end, integrating them with **Python** backend **REST APIs** to handle complex data flow, error, and loading states.
- Contributed to backend integration for an **AI-powered** feature, working across data ingestion pipelines and API design.
- Enforced **RBAC** and code-quality standards through peer code reviews across the production codebase.

PROJECTS

MCP Assistant | *Python, FastAPI, MCP SDK, React.js, Groq, PostgreSQL, Docker*

(Aug. 2026 - Sep. 2026)

- Architected an **agentic AI** chat assistant as independent microservices using the **Model Context Protocol (MCP)**, with a central orchestrator that discovers and routes to plug-and-play tool servers (web search, file ops, external APIs).
- Built a **FastAPI** API gateway for routing, CORS, and rate limiting, and a **PostgreSQL** (async SQLAlchemy) conversation service, deployed via **Docker Compose** with isolated, independently-failing services.
- Integrated **Groq** for sub-second LLM reasoning and a **React 19/Vite/Tailwind** chat frontend, scoping API keys to only the services that need them.

CalmNest | *React.js, Node.js, Express.js, MongoDB, JWT, Gemini API*

(Jan. 2026 – Mar. 2026)

- Built and deployed a full-stack mental wellness platform solo – **React.js** frontend (Netlify), **Node.js/Express.js** backend (Render), with **JWT** auth and per-user MongoDB data.
- Shipped **Gemini-powered** AI chat, CBT insight generation, and crisis detection alongside mood tracking and guided journaling.
- Designed a REST API layer with input validation and error handling for production reliability.

[github.com/CalmNest](https://github.com/khushiagggarwal300/CalmNest) Live Site

FilePilot | *Python, OOP, SHA-256, Logging*

(May 2026)

- Built a modular **CLI** tool that scans, categorizes, and organizes files, using **SHA-256** hashing to detect duplicates across directories.
- Architected the system as independent modules (scanner, organizer, duplicate detector, report generator) following **OOP** principles, generating structured **JSON/CSV** audit reports with centralized logging.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, Flask, REST APIs

AI/ML & GenAI: LangChain, LangGraph, MCP, RAG (Retrieval-Augmented Generation), Pydantic, LLM Integration, Conversational AI Agents, Prompt Engineering, Vector Databases

Databases, Tools & DevOps: MongoDB, MySQL, PostgreSQL, Docker, Git, Postman, VS Code, CI/CD

ACHIEVEMENTS

- Qualified for **Smart India Hackathon 2023**, outperforming 500+ participants across 3 internal rounds.
- Earned an **Elite Silver badge in Cloud Computing** from NPTEL (IIT Kharagpur), ranking in the top 5% of 20,000+ participants.
